POLARIZATION DIALECTICS

REGARDING CREATION & HUMAN ORIGINS

Darwinian "Evolution" Paradigm:

Matter is supreme. Spirit is non-existent or insignificant. There is no underlying intelligence or consciousness in Nature. Nature is a dead and mechanized clockwork without purpose. Humans are permanently and hopelessly controlled by our genes, just as a computer program is bound by the code that comprises it.

This paradigm can lead to the left-brain imbalanced belief that Psychopaths are "Alpha Humans" because the process of Natural Selection chose them to rule Humanity, therefore their existence and way of being is something that should be celebrated as an "evolutionary advantage," and something which other human beings should aspire to emulate.

POLARIZATION DIALECTICS

REGARDING CREATION & HUMAN ORIGINS

Creationism Paradigm:

Spirit is supreme. Matter is lesser and inferior, and should be looked down upon. God, who is *separate from* the Creation, controls every event within Creation, and there is nothing we can do to create change in our lives if God does not will it to be so.

Can lead to the right-brain imbalanced belief that the entire manifest Universe is an unchangeable Cosmic Prison (Hell) which serves as an endless torment for all incarnate beings. Such a belief promotes total inaction in the face of Evil in our midst. Pacifism, the belief that only Evil may ever wield Force, and that there is no such thing as the moral employment of Self-Defense, can also stem from similar right-brain imbalanced, "Spirit is superior to Matter" world-views.

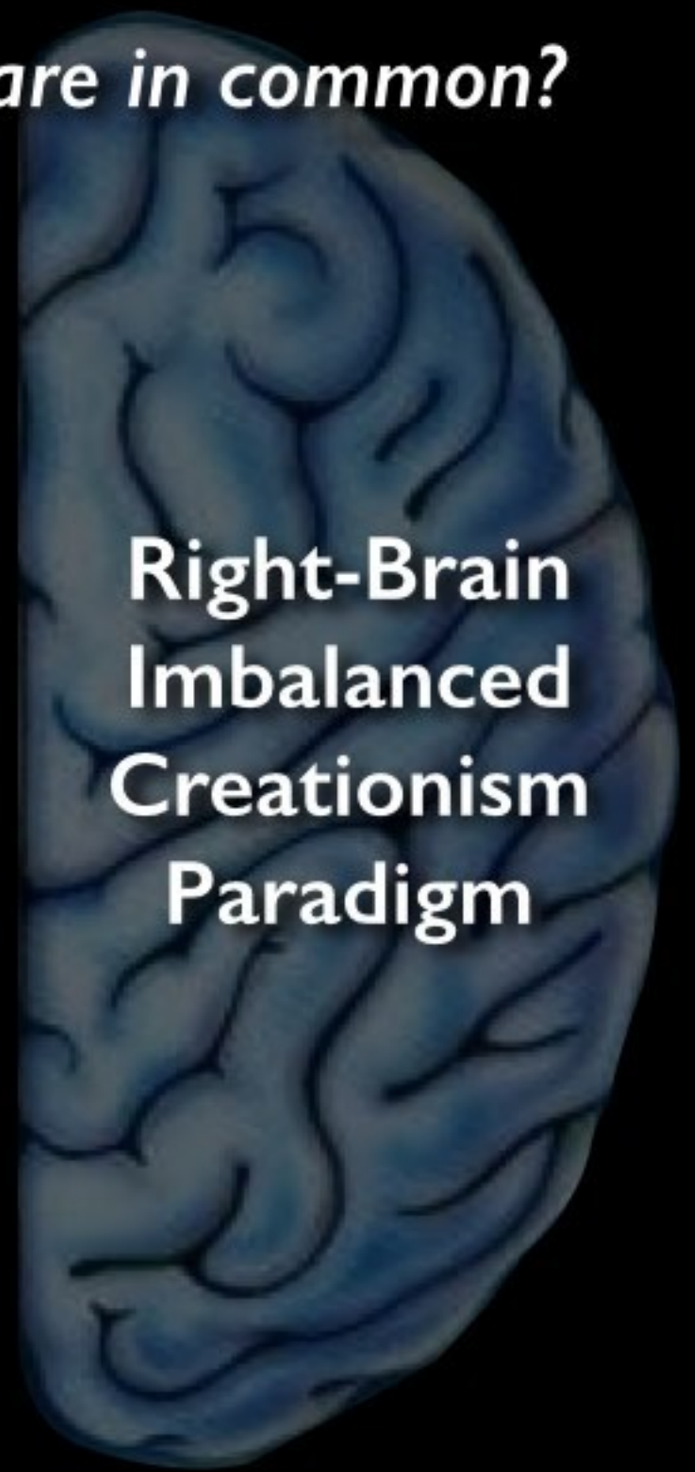
POLARIZATION DIALECTICS

REGARDING CREATION & HUMAN ORIGINS

What do these two Polarizing Paradigms share in common?

Left-Brain Imbalanced Darwinian "Evolution" Paradigm

- Total dismissal of FREE WILL
- Dismissal of Consciousness and its ability to create change
- Externalization of all power (We are either at the mercy of genes or God.)
- A deeply entrenched belief that the Human Condition ***CAN NOT*** be changed.



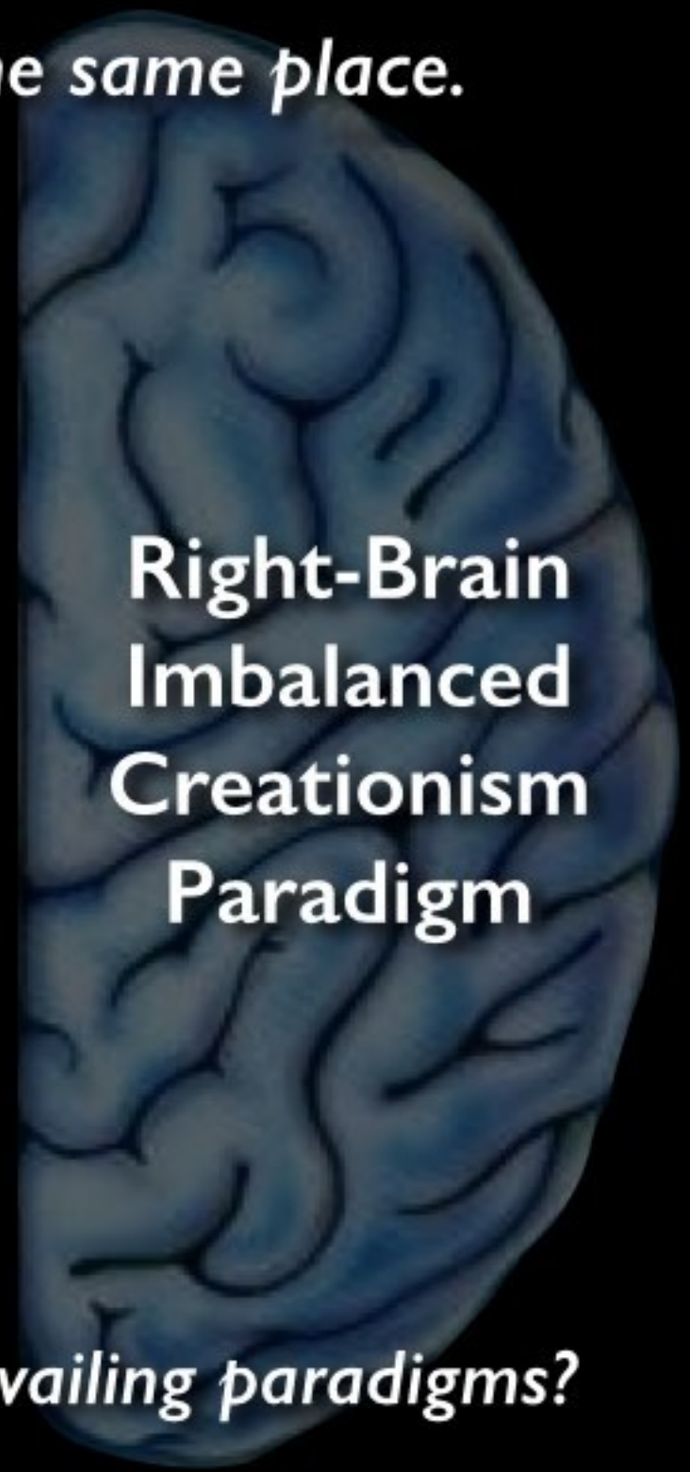
Right-Brain Imbalanced Creationism Paradigm

POLARIZATION DIALECTICS

REGARDING CREATION & HUMAN ORIGINS

Both of these Polarizing Paradigms lead to the same place.

Left-Brain Imbalanced Darwinian "Evolution" Paradigm



Right-Brain Imbalanced Creationism Paradigm

Is there an alternative to these two imbalanced prevailing paradigms?
